

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday, July 6th 1944

ALBERTA PROVINCIAL LIBRARY
JUL 10 1944
1944

There has been two good
rain this week in this district

Mr. and Mrs. August
Rosenau were in Calgary last
week, and while there Mr.
Rosenau had his tonsils
removed.

Mrs. McKinnon and two
children of Sedgewick, are
spending two weeks with her
sister, Mrs. Elwyn Robertson
and the Broston Bros.

Two nieces and a nephew
from Saskatoon, arrived in
Chinook last week and will
spend the summer vacation at
the home of their uncle, Mr.
R. Mawdsley.

Mr. and Mrs. W. Wilson
returned after having spent
some weeks visiting with
friends and relatives at Atha-
basca and Edmonton. They
also visited with a number of
former Chinook friends.

Miss Eileen Proudfoot
nurse-in-training at the Gen-
eral Hospital, arrived here on
Wednesday, and will spend
two weeks with her parents.

"Foreign Correspondent" will
be shown at Youngstown
Wednesday, July 12th, at 8:30

Mr. A. Mayfield left on Wed-
nesday for Vernon, B.C. and
other places, where he expects
to spend a month or two.

Miss Doris Hittle came in to
town this week to write off her
examinations.

The Ladies Card Club met
at the home of Mrs. Peyton.
Prize winners were Mrs.
Peyton and Mrs. Robinson.

The Club will meet next
week with Mrs. Robinson.

The Chinook picnic held on
Wednesday afternoon at the
Gingles grove was quite a
success, although the crowd
was not as large as expected.
The weather was good and
a large crowd attended the
Picture Show in town at night
which was good.

YOUNGSTOWN

NEWS

Mr. Wallace Armstrong R.
C. A. F. spent a few days leave
with his parents, en route to
Vancouver where he is sta-
tioned.

The Scotfield Sports was
well attended on Saturday
afternoon. Ball games, races
and pillow fights together
with the dance at Youngstown
in the evening provided a
enjoyable time for all.

The annual picnic at Berry
Creek was well attended on
July 1st. Ball games, races,
contests and boating were
much enjoyed.

Miss Hazel Smith and Mr.
Charles Rosenau Jr. visited at
the home of Mr. and Mrs. A.
Robusky for the week end

Two nieces and a nephew
of Mr. Mawdsley from Regina,
arrived here last week and
will spend the summer vacation
with Mr. and Mrs. Mawdsley
and family.

Miss Hilda McCurdy of
Calgary visited at the home
of Mr. and Mrs. W. A. Edler on
Sunday.

A much needed rain of
three-quarters of an inch fell
Saturday night.

ONE MAN'S INCOME

IS ANOTHER MAN'S

OUTgo...

IF rising prices and costs were allowed to keep
pushing each other up, inflation would be un-
avoidable. That's what inflation is—a panic rise
in prices—with money losing its value and
confusion everywhere. To prevent inflation, a
ceiling has been set on prices and profits,—
wages and salaries have been controlled.

I WANT MORE!
If one person demands higher
prices—another higher profits—
another a higher wage or salary
—soon everybody would be mak-
ing the same demands—demands
on everyone else.

Then costs of production could
not be controlled.

The ceiling could no longer be
held.

Living costs would go up—

INCOME OUTgo
and INCOME OUTgo
begin their frantic rise.

ECONOMIC STABILITY IS NECESSARY TO MEET THE PRESENT PROBLEMS
OF WAR AND TO PROVIDE A BASIS FOR PEACE

The Pick of Tobacco

Women In The Service

IT IS WELL KNOWN that the women of Canada have been willing and eager to undertake war service. Many have joined the women's divisions of the armed forces, while others have replaced men of military age in industries and in the business world. There are also thousands of volunteer workers who serve in many capacities and whose help is invaluable in these times. In supporting the war effort in this manner, Canadian women have demonstrated, as have the women of the other Allied nations, that they desire to share as fully as possible in the winning of the war. This has entailed hardship and sacrifice and in some cases considerable danger, but these have been met with admirable spirit, and it has been shown that without doubt women are capable of giving valuable service to their country when it is needed.

Have Played An Important Part

The part of women in the war as a whole has been an important one. From Russia there have come many stories of the heroism of women of that country who have taken part in combat and showed outstanding valour. The underground movements of many of the Occupied countries have in some cases been made up largely of women, since few men have been left in some of these areas. Women of the underground organizations have participated in all forms of resistance, even in military operations. Many have been captured and punished by the Germans, but those who were left carried on, never slackening their efforts. When the war is won, to them will go honor and credit for having given unstinted help to the Allied cause in the face of extreme danger and hardship.

Work Behind Front Line

The women of Britain have likewise made a valuable contribution to the Allied war effort. At the beginning of the war, the women's branches of the armed services were organized mainly for domestic and clerical duties, but they now undertake a great variety of work "behind the front line" which was formerly done by men. This has helped in no small measure in building up the great forces now operating in Europe. Women's divisions of the Canadian armed forces have likewise worked for months in preparation for the Allied landings in Europe. The British Ministry of Information recently issued an interesting account of the services rendered by women in uniform and it concluded with the following statement: "Without them neither the British nor Allied forces based in Britain would ever be able to go into battle. When Europe is liberated and the victory over Germany is won, it will be due no less to the girls who gave up their homes and careers for the hard working life of the camp, than to the fighting men of all nations."

Sleeping Sickness

Horses Should Be Shielded From Encephalomyelitis

The time is now approaching when encephalomyelitis—the sleeping sickness of horses—usually occurs. So far, scientists have not found an effective drug remedy but experience has shown that early vaccination by a qualified veterinarian is the best preventive. The protection of horses against biting insects is also a great help. However, the Veterinary Director General of Canada points out, that while it is not recommended that all horses should be vaccinated, farmers should be prepared to act promptly if the disease makes its appearance in their district or in any neighboring territory. In districts where the disease appeared last year, the owners of valuable pure-bred animals would be well advised to have them vaccinated as a precautionary measure. Sleeping sickness in horses may infect man with a similar type of disease.

WAS QUITE RIGHT

Firemen digging for victims of a flying bomb in the south of England heard a hoarse voice crying from beneath a heap of rubble: "Blimey what a blooming war." The exclamation was repeated again and again and firemen thought the victim had become unbalanced because of shock. After digging for a half-hour, the firemen cleared away broken floor-boards and saw in a cavity—a parrot. The bird was taken away, still screaming "Blimey, what a blooming war!"

GOOD WORK

The Swedish radio has reported that a Danish saboteur, dressed as a dockyard worker, blew up three German ships in Svenborg, shipyards and badly damaged a fourth by placing bombs in the vessels.

Getting His Wish

Hitter Not Anxious For War When He Was Sixty

On one of the tense and terrible days of late August, 1939, the British Ambassador, Sir Nevile Henderson, sat with Adolf Hitler listening to the Fuehrer's maniacal tirades. "I spoke," Sir Nevile reported that evening, "of the tragedy of war and of his immense responsibility, but his answer was that it was all England's fault . . .

He was, he said, fifty years old; he preferred war now to "when he would be fifty-five or sixty." Adolf Hitler is now 55 years old; he still has the war which he began so lightly then, but in one thing, at least, history will certainly consult his preference. He will not be at war when he is sixty.—New York Herald Tribune.

GEMS OF THOUGHT

HUMILITY

True humility is not an abject, self-despising spirit; it is but a right estimate of ourselves as God sees us.—Troy Edwards.

There is no humiliation for humility.—Joseph Roux.

They that know God will be humble; they that know themselves cannot be proud.—Plaut.

Human pride is human weakness. Self-knowledge, humility, and love are divine strength.—Mary Baker Eddy.

There is but one road to lead us to God—humility; all other ways would only lead astray, even were they fenced in with all virtues.—Euloeau.

Lord of all life, below, above, Whose light is truth, whose warmth is love,
Before Thy ever blazing throne We ask no lustre of our own.

—Oliver Wendell Holmes.

Price Control And Rationing Information

Q—When I apply for my baby's ration book, will I be able to get a saving sugar coupon also?

A—Yes, when you make application and secure the baby's book you will be given a saving sugar coupon at the same time.

Q—My grocer often tears out expired coupons from my ration book. He says they are no good to me. Is he right?

A—You should tear out and destroy any unused expired coupons yourself. It is true they are of no use to you but the retailer might use them to obtain goods to which he is not entitled.

Q—May I exchange "F" coupons for preserve coupons? Are they good?

A—The first "F" saving sugar coupon became valid May 25. They may be exchanged for preserves coupons if you do not want to purchase saving sugar. Take them to your nearest local ration board and they will make the exchange.

Q—Do I have to surrender coupons for canned grapefruit?

A—Yes, a saving preserves coupon may be used in exchange for a saving grapefruit. However, no coupons need be surrendered by housewives purchasing grapefruit juice. It isn't rationed.

Q—My son has been discharged from the armed services. Where do I obtain his ration book?

A—Discharged servicemen may obtain a ration book by presenting their discharge papers at any local ration board. Canning sugar coupons will also be supplied at the time application is made for the No 4 book.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book, which lists the price (in track of your ceiling prices) mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

A Veteran's Idea

Canadian Soldiers In Italy Get Cigarettes The Easy Way

Canadian soldiers chasing Germans through the hills of Italy may not know it but they owe a vote of thanks to Walter Calow of Paraboro, N.S., and Paraboro, the men of the First Great War. For it was largely through his work that they are getting their cigarettes three months earlier.

Two years ago Calow got the idea of setting up a cigarette depot overseas. Instead of sending cigarettes from Canada, friends would mail a card and the soldier could take it to a tobacco bank and draw from a large stock, thus eliminating weeks of waiting and danger of loss.

The task of establishing a depot reached Defence Minister Ralston and he took it along with him on his visit to Italian battle zones. The lack of cigarettes in Italy and the price of those available convinced him that Calow's plan was sound. And the plan, slightly altered, has gone into effect.

LARGEST AND SMALLEST
The world's largest and smallest flowers belong to the same family, the aconites. Blossoms of the amorphophallus are eight to 10 feet in diameter, while those of the duckweed are invisible to the naked eye.

For six months after it is hatched, the box turtle does not eat.

Variety Of Names

Many Unusual Ones Are On Canadian National Railways' Payroll
"Early and Late", "Beck and Call", "First and Last", "Begin and End" and a "Donald" who is alive and working, are some of the more than 100,000 names on the Canadian National Railways payroll.

Research shows that the use of surnames dates back to some time between the years 1000 and 1250, originating through association with occupation, craft, descent, locality, personal descriptions or nicknames. For instance, Smith is a derivative of blacksmith, Johnson—John's son, Atwell—at the well, and Langfellow—long fellow. There is no restriction placed on the Christian names that may be used in the British Empire and the United States, but in France and Germany only those contained in a list issued by the state are allowed. Spain has her own novel way, surnames being combined in different ways for the mother, father and children.

More than 2,400,000 pay cheques are issued annually to cover 100,000 Canadian National employees. To complicate matters there are 3,500 Smiths, of which 267 are William Smiths, 238 John Smiths and 152 James Smiths. There are 2,000 Browns with the same initial, as also applies to the Joneses, Whites and Thompsons.

Other names of Canadian National employees are Longstaff and Kane, Cole and Button, Big and Little, and, in a group associated with religion, Abbey, Abbott, Angel, Bishop, Brother, Canon, Chapel, Church, Deacon, Dean, Elder, Grace, Kirk, Monk Noel, Nun, Parsonage, Pope, Priest, Parrish and Temple. Automobile trade names are Austin, Ford, Dodge, Chrysler, Hudson, Maxwell, Packard and Willys. Five of the first six months of the year are represented in the list of names, January, March, April, May and June, while there is only August in the last half of the year.

There's a Baker who is a cook, a Cook who is a chef, and believe it or not, a Porter who is actually a porter.

Aided The Invasion

British Housewives Give Assistance In Packing Materials Needed

A great number of British housewives give active assistance in preparing the Allied armies for the invasion.

They are grandmothers, working girls, old age pensioners, who worked for weeks packing invasion stores.

More than 375,000,000 articles

were packed and ready to be shipped wherever any unit of the army needed spare parts for its equipment.

These women, working in barns, fire halls, schools or any building that could accommodate them had the job of coating each spare with preservative and packing it in a carefully labelled cardboard box.

Manufacturers who made the parts did not have the spare labor to pack the articles as carefully as experience in Italy and Sicily taught they must be packed.

ITCH CHECKED

CEREALS HAVE A PLACE AT ANY MEAL, ANYTIME !

Busy housewives appreciate Kellogg's ready-to-eat cereals more and more every day. Kellogg's are a satisfying dish anytime—for breakfast, lunch, odd-hour snacks. Ready in 30 seconds.

Making Them Gay

Britain's Restaurants Being Re-decorated And Made To Look Attractive

Soon after the Ministry of Food started its British restaurants—there are now 3,000 in Britain—it was realized that food eaten in ugly surroundings was a poor substitute for meals at home. Therefore, under the guidance of an art adviser, Clive Gardner, a scheme was started to make the restaurants look more attractive. Now about 150 of them have been decorated with mural paintings in gay colors scenes from all over the world, writes A. J. Cummings, from London to the Hamilton Spectator. The walls of the British restaurant in Bradford, Yorkshire, for instance, are covered with scenes from K. B. Priestley's novel, "The Good Companions". Mr. Priestley and his hero, Jess Oakroyd, are both Yorkshiremen. A restaurant for children in Beckenham, Kent, has scenes from Kenneth Grahame's famous book, "Wind in the Willows", while another has some gay scenes from "Cinderella". The mural paintings in the British restaurants have given so much pleasure to those who take their daily meals there that the scheme has now been extended to factory canteens.

Too Many Horses

Unusual Situation Confronts Farmers In Western Canada

The surplus horse problem in Western Canada has reached such proportions that vigorous action will be required to meet it. Following the example of Saskatchewan, a co-operative marketing organization has been set up in Southern Alberta to see what can be done about the rapidly-increasing horse surplus in this province. Those promoting the organization deserve solid backing from the Government and farmers generally.

Some authorities estimate that Western Canada now has 500,000 horses above the number required for farm work and other enterprises using horses. Harassed by labor shortages, many farmers have simply turned out their horses to forage for themselves. They are now devoting hours in the range country that could support many thousands of cattle and sheep.—Edmonton Journal.

Not A French Word

Czech Novelist Originated "Robot" In One Of His Plays

The robot raids on Britain bring into more common use a word often mispronounced under the impression that it is French. The "I" is not silent. The pronunciation given by the Oxford English dictionary closely approximates "rowboat", but American dictionaries make the last "o" short to rhyme with "not". The word is derived from the Czech "robota", meaning statute labor and "robota", meaning a serf. The Czech dramatist and novelist Karel Capek originated it in 1920 in his play *R.U.R. (Rossum's Universal Robots)*, a satirization of the machine age which was translated into English in 1923.—Toronto Star.

Many indications of rich gold deposits have been discovered in the Altai mountains of Sinkiang, province of China.

Each piano contains about 300 pounds of metal.

Good Gardening Takes More Than Fancy Equipment

Last year there were some war-time gardeners who had had luck with their crops. Many of these started with a burst of enthusiasm but in a due effort to produce a garden better than their neighbours they bought a lot of equipment without the knowledge of how to use it. This can happen to anyone keen about a job. Throughout the season this year, a little more thought, discussion and study is going to put right the mistakes of last year.

Gardeners expect that last year, tons of potential food for Canadian families was lost because Mr. and Mrs. War-time Gardener were green at the job. This year Mr. and Mrs. W.G. are going to produce that food or know the reason why!

TESTS RADIUM

The bureau of standards in Washington employs a woman to test highly dangerous radium. She has weighed, measured, and tested 70 grams of radium in the last 12 years, an amount valued at \$5,000,000.

At cruising speed, Flying Fortresses use 250 gallons of gasoline an hour. At full throttle, the rate is about doubled.

In the dry season, Lake Chad, in Africa, frequently shrinks to one-half its normal size.

ELECTRIC SCARECROW
Fruit growers in Britain trying to protect their crops have adopted an electric scarecrow. Connected to a six-volt battery, lines are run over and among trees. Birds perching on them get an electric shock and keep away.

This Roman girl, letting curiously get the better of her, fingers a kill worn by Pipe Major William MacConnachie after massed pipe bands played in Rome. Surveying the vast historic Coliseum with MacConnachie is Pipe Major William Boyd.

The Quality Tea "SALADA" TEA

OUR COMPLETE SHORT STORY—

Light From Below

BY VANCE C. CRISS

McClure Newspaper Syndicate

The throng about the shaft house of the One Girl Mine tensed forward at the sound of the hoist. News from the depths where men fought to rescue fellow miners trapped by a cave-in, their fate unknown.

Grizzled old Joe Blades, "brung up" in an Ozark mountain mine, stepped from the bucket rim at the ground level. He shot a quick glance over the crowd, strided to Betty Knox, straining grimly at the barrier rope. "They're needin' you down there, Jeff got a bash on the head."

Betty stiffened. "If Jeff Logan thinks I'll run when he whistles, even if he—"

"Jeff didn't whistle. Doc Carney wants somebody. Come on!"

Joe Blades turned back toward the shaft. Betty Knox fell in behind him. The grizzled miner grasped the cable, stepped on the bucket rim. The girl followed suit, one foot each side of the bucket handle, opposite Blades.

Betty's heart pounded as the hoist eased them down. Her first descent since that last quarrel with Jeff Logan! Her first meeting since then with the young owner who had named the One Girl Mine for her!

The bucket settled on the rock floor at the foot of the shaft. Betty stepped off, walked slowly toward Dr. Carney who was kneeling above Jeff Logan. Jeff saw her, turned his face to the wall. "I told Doc I didn't need any nursemaid," Jeff Logan, "Betty whispered.

There was a rumble of grinding rocks. Jeff Logan started fiercely toward the jumbled mass that blocked the drift. Betty grabbed him. "Jeff! You mustn't! You're not strong enough!"

The young mine owner shook her off, strode on, crawled into the death.

A agonizing minutes passed while the two men who had meant most to Betty's life were gone. Joy flooded her when Jeff Logan, crawling out after his drugged, unconscious young physician had disappeared. "You'll be responsible for that man's death, Jeff Logan," Betty whispered.

"I know you don't," Betty fumed. "All you got is a knock on the head and you're so everlasting mule-headed!"

"Yes, and you're so everlasting stubborn!"

"Please! Please!" Dr. Carney urged.

The young physician retained his professional poise with difficulty. A newcomer to the hills, he had fallen in love with Betty Knox—was determined to win her. Yet here she was with the man to whom she recently was engaged—the man who had just risked his life to rescue one of his workmen. And, in addition, a young couple who could forget

Brings you

WRAPPED AIRTIGHT
TO ENSURE POTENCY

danger to storm at each other, might not be so far apart as they thought.

"If the whole mine caved in on you," Betty snapped at Jeff Logan. "It wouldn't make a dent in your stubborn pride!"

"Please! Please!" Dr. Carney interrupted again. "Can't you remember where we're—where we broke to the wharf on Joe Logan?" "I told you not to bring Miss Knox down here. Haven't you any sense at all?"

"Reckon I'm 'bout the only one down here that has sense," the old miner drawled. "Betty stay in your own drift, Doc, or—"

Broke off as little Willie Hargis staggered toward them. "No use trying through that fallen rock any more," Hargis said. "Too risky. We'll have to wait for the crew to blast to 'em from the No. 3 drift."

"I'll take a flag at it," Joe Blades remarked, and headed toward the cave-in.

"Joe! Come back here!" Logan called, struggling to his feet as the old man reluctantly halted. "I'll try again."

"Jeff Logan," Betty snapped, "you can't be anything but a stubborn fool!"

"I'll go," Dr. Carney announced.

"No! No!" Betty protested. "You're not a miner. You can't hope to do any good."

"I'll go, Dr. Carney repeated, headed back toward the tumpled wall of jagged rock.

Betty Knox stared after him, knowing he didn't want to go, why he forced himself on. Turning, she saw Jeff Logan sway dizzy. Fighting back the tears, she stared alternately at him and at the hole where the young physician had disappeared. "You'll be responsible for that man's death, Jeff Logan," Betty whispered.

There was a rumble of grinding rocks. Jeff Logan started fiercely toward the jumbled mass that blocked the drift. Betty grabbed him. "Jeff! You mustn't! You're not strong enough!"

The young mine owner shook her off, strode on, crawled into the death.

A agonizing minutes passed while the two men who had meant most to Betty's life were gone. Joy flooded her when Jeff Logan, crawling out after his drugged, unconscious young physician had disappeared. "You'll be responsible for that man's death, Jeff Logan," Betty whispered.

"I know you don't," Betty fumed. "All you got is a knock on the head and you're so everlasting mule-headed!"

"Yes, and you're so everlasting stubborn!"

"Please! Please!" Dr. Carney urged.

The young physician retained his professional poise with difficulty. A newcomer to the hills, he had fallen in love with Betty Knox—was determined to win her. Yet here she was with the man to whom she recently was engaged—the man who had just risked his life to rescue one of his workmen. And, in addition, a young couple who could forget

"You'll soon be all right," he said.

Black Jed Frame came running toward the men that were trapped; the fellers had put a drill hole through the men that's trapped," he pointed. "They're all right, but needin' air. Jake's blowin' 'em that through the hole. They can hold out till we cut through to 'em."

"Thank God!" Jeff Logan exclaimed.

Betty Knox glanced at Dr. Carney, standing now, then turned with burning eyes to face her former flame. "Jeff," she began, "I—I want—"

"I don't want your thanks," Jeff Logan broke in.

"I don't want to thank you," Betty declared with a stamp of her foot. Then, with quivering lips, she added: "I—I want my ring back, Jeff."

No Gasoline Worries

Chatham, Ontario, Woman Drives Electric Car Built In 1919

Although gasoline and tire rationing throughout the war years have affected all motorists to some degree, there is one woman in Ontario to whom these restrictions haven't meant a thing as far as her own motoring is concerned. She is Mrs. Robert Gray, 141 William St. S., Chatham, owner and driver of the only electric car in operation in the province. Mrs. Gray, who is over 80 years of age, is the wife of the former Gray Dort motor car manufacturer.

Mrs. Gray requires no gasoline ration book and, while other motorists have had to curtail their driving or lay up their cars for the duration, Mrs. Gray continues to drive at will about the city and country, although she hasn't taken any long motor trips in some time.

Although it was manufactured in 1919 the car handles easier and is more economical to operate than any car today. Power is supplied by 42 batteries, each of two volts, and weighing a total of 1,400 pounds.

Prisoners In Japan

Arrangements Are Attempted For Regular Service Of Mail And Supplies

Prime Minister King told the House of Commons that he hoped arrangements could be made for a regular service of mail and relief supplies to Canadian prisoners of war and Canadian nationals interned in Japanese territories.

The arrangements contemplated called for delivery through Vladivostok or some other Soviet port. All supplies delivered would be pooled and would be available to other Allied prisoners and nationals as well as to Canadians.

For more than two years, Mr. King said, despite repeated, dis- appointments and refusals by the Japanese Government to accept

various proposals the Canadian Government had persisted in efforts to arrange such a service using both the agencies of the International Red Cross and the Swiss Government.

Recently stores had been sent to Vladivostok and some 15,000 tons now were stored there. Japan had offered to send a ship to a Soviet port to pick up supplies. The Soviet Government was prepared to permit the loading of supplies at a Soviet port. The reply of the Japanese to the Soviet offer was being awaited—Ottawa Journal.

SMILE AWHILE

Landlord—Are you a chess player?

Prospective Tenant—Yes. Why do you ask?

Landlord—I prefer to rent to them. They so seldom move.

"My old man's nerves are that bad," Mrs. Robinson said to the chemist, "he's afraid to ask for a raise. Would it do any good to give him a dose of them aspirin tablets?"

First Doctor—I had an unusual case.

Second Doctor—What was it?

First Doctor—I attended a grass widow with hay fever.

Motorist—Have you anything in the shape of automobile tires?

Storekeeper—Yes, indeed. Life preservers, invalid cushions, funeral wreaths and doughnuts.

Officer in charge of rifle range—Don't you know any better than to point an empty gun at me?

Race Reporter—But it isn't empty, sir; it's loaded.

Wife—Every time you see a pretty girl, you forget you're married.

Husband—You're wrong, my dear. Nothing brings home the fact with so much force.

A junk shop near a railroad crossing in Denver carries a sign with this hint to motorists: "Go ahead; take a chance. We'll buy 'the car."

Mother—Maud, were you a good little girl at church today?

Maud—Yes, mother. A man offered me a big pile of money, and I said, "Thank you."

Mistress—I've asked Mr. and Mrs. Smith to dinner at seven, Jenny, but I think we'll give them a quarter of an hour's grace.

Maid—Well, ma'am, I'm religious myself, but I think you are overdoing it.

Father—You ought to be ashamed of yourself, not knowing what you learned at school today. Willie Brown always knows.

Bobby—Yes, but he hasn't so far to go home.

"You hit the plaintiff with a chunk of coal, and your conduct presents not one extenuating circumstance."

"Bogart, pardon, sah; jes' one, sah. It was soft coal, sah!"

Stern Parent—Now, Willie, I'd like to go through a whole day without once scolding or punishing you.

Willie—Well, mummy, you have my consent.

Mr. Semi-Defacto—For goodness sake, Ethel, stop making that alarm clock go off! What's the idea, anyway?

Mr. Semi-Defacto—I only want to make the neighbors think we have a telephone.

Mobile Field Hospital

R.C.A.F. Nursing Sisters From Canada Are On Duty

Designed to provide hospital service to advanced fighter airfields when D-day broke, the R.C.A.F. mobile field hospital unit has handled more than 100 front-line casualties since "D-day plus one" on the shores of Normandy. Wing Commander J. M. "Mickey" Givens, London, Ont., is commanding officer of the unit.

"The first night we were there," said Givens, "they blazed us continuously. I spent most of the night with an orderly running here and there, treating as many as we could.

Our surgeon, Squadron Leader "Chief" Church, (Perth, Ont.), had to operate during it, too."

"The first night we were there," said Givens, "they blazed us continuously. I spent most of the night with an orderly running here and there, treating as many as we could.

First Canadian servicewomen to reach the beachhead were two R.C.A.F. nursing sisters—Flight Officers "Molly" Mulholland, George Town, Ont., and "Peg" Pitticley, Ottawa, Ont. Tin hats, battle dress and flying boots guaranteed protection for the nomad nurses against any tricks the weatherman might play on them and left them free to concentrate on treatment problems in their tented hospitals.

Months of careful preparation went into development of the mobile unit. From the start, it was planned that everything would be under canvas. Staff quarters, patient's wards, and even the operating theatre—composed of several tents joined together—can be packed and moved in a hurry.

During its training period in England, the mobile hospital unit, like other units of the 2nd Tactical Air Force, to which it belongs, changed locations frequently. It was the soundest way of developing its mobility. Loading tents and all other equipment on their own mechanical transports, mobile unit members moved in convoy by day and night over the English countryside, stopping to pitch tents and carry out their full routine of duties.

When it came time, all that training paid off handsomely. Campsites, conditions were normal, though German shells and bombs added a familiar note. Appendicectomies have been successfully carried out under battle conditions and patients receiving further treatment are quickly flown in giant Dakotas and Harrow bombers, converted for the task to base hospitals in Britain.

American Flyer Who Bailed Out Over Occupied Belgium

According to the New York Belgian Information Centre, the following is an eyewitness account from underground sources in occupied Belgium of the bailing-out of an American flier during the course of a raid on Haren, near Brussels, in May.

"The American parachutist was coming down so fast we had to run, thinking that he might fall on us. He finally landed on a roof in the Avenue Roger in Brussels. I can't describe the enthusiasm of the Belgians. German soldiers who entered the building to arrest the American were bopped by the crowd.

"From the roof the American saluted the crowd and finally came down to be arrested by the Germans. When they took him away in a car, the Belgians bombarded the car with bouquets of lilies of the valley, which everyone traditional carries in Belgium during May."

BEE RESEARCH

To test our results of research, to conduct certain projects relative to apiculture management applicable to local conditions and to demonstrate modern equipment and methods, the Bee Division, Dominion Experimental Farms Service, maintains experimental and demonstration apiaries at farms and stations throughout Canada, in addition to the central apriary at headquarters of the Division at the Central Experimental Farm, Ottawa.

"From the roof the American saluted the crowd and finally came down to be arrested by the Germans. When they took him away in a car, the Belgians bombarded the car with bouquets of lilies of the valley, which everyone traditional carries in Belgium during May."

THE SMILE OF DEATH

"Over her arm she carried a death sin handbag, in which he hid the gun with which she shot and wounded several American soldiers. Her method was to smile at them until they came within range and then let them have it."—New York Times.

Safety First

There Are Too Many Accidents On Canadian Farms

The cold truth is that the ratio of preventable accidents in agriculture is higher than in any other industry. Many hundreds of farmers, members of their families and workers on farms are killed and many thousands injured every year in Canada as a result of accidents, most of which could have been prevented.

First Canadian servicewomen to reach the beachhead were two R.C.A.F. nursing sisters—Flight Officers "Molly" Mulholland, George Town, Ont., and "Peg" Pitticley, Ottawa, Ont. Tin hats, battle dress and flying boots guaranteed protection for the nomad nurses against any tricks the weatherman might play on them and left them free to concentrate on treatment problems in their tented hospitals.

A survey has disclosed that machinery is the chief source of farm work accidents: that live stock runs a close second and that falls are in third place. The wise farmer is he who learns the causes of accidents on his farm takes steps to eliminate such causes and all possible hazards.

For example, the fact that loose clothing causes one-third of all farm accidents involving machinery should make anyone avoid that particular hazard like the plague.

And the ever-present threat of fire, which annually destroys millions of dollars worth of rural property, ought to be enough for a farmer to justify devoting at least a part of one morning per month to looking round the farm for fire hazards, and accident hazards, too.

Prevention of accidents means avoiding making an acute farm labour shortage more acute and also means an even bigger contribution to food production.

Safety First is a good slogan for any farm.

Flooded Farmlands

Germans Have Put 300,000 Acres In Holland Under Water

Nearly 300,000 acres of farmland in the coastal areas of the Netherlands have been flooded as a result of German anti-invasion measures, according to the Dutch underground paper "One Volk" (Our People).

The flooding of this farmland, the paper said, would mean the loss of 66,138,000 pounds of wheat, 17,636,800 pounds of beans, 400 pounds of fats, 88,184,000 pounds of sugar, 22,046,000 pounds of fruits, and 881,840,000 pounds of potatoes.

This Week's Pattern

BY ANNE ADAMS

Look demure in your dirndl with its gay print. Pattern 7416 frames you with a wide, full neckline for over-the-shoulder blouse.

Pattern 4716 comes in Junior Miss sizes: 11, 13, 15, 17. Size 13, with short sleeves, all one fabric, 23 yds. 55¢.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size Name, Address and Style Number and send order to: American Artistic Pattern Co., 175 McDermot Ave. E., Winnipeg, Man. "Because the slowness of the mails may take a few days longer than usual."

Flowers A-Bloom In The Cookie Jar

Donuts won't tell and "Marguerites" don't have to if they're made with crisp bacon cereal and crunchy nut meats. The good word comes fast from hand to mouth!

Orangeade garnished with mint, a platter of cookies mean refreshment aplenty. The recipe for these new-fashioned "Marguerites" appears on this same page.

MARGUERITES

2 eggs
1 cup brown sugar
1/2 cup flour
1/2 cup All-Brain

Beat eggs slightly; add remaining ingredients in the order given. Fill small buttered pans 2/3 full of mixture. Bake in a moderate oven (350 degrees F.) about 15 minutes. Cool slightly before removing from pan. Dust with powdered sugar. Yield: 2 1/2 dozen (2 inches in diameter).

OVERSEAS THE MACDONALD TOBACCO COMPANY

wish to announce that new Government regulations, effective immediately, restrict the sending of cigarettes to the Boys overseas to the 300 size only.

REMEMBER—300 size parcels only with a limit of 900 cigarettes per individual per month.

Meeting of pro-
posed Hospital

Was Held

A meeting of the Board of the proposed Municipal Hospital district, was held in Oyen on Wednesday, June 28th.

Members from the west side were: D. E. Bell and S. W. Warren, Chinook and A. B. Hughes and M. Rogers, Cereal.

Mr. Maxwell, supervisor of Municipal Hospitals, of Edmonton, outlined the proposal and reason for the appointment of new Board. Some criticism was expressed in regard to the alteration of the boundary of the proposed district by taking in a large area in the east side, which would have a bearing on the location of the hospital.

It was explained that the residents had petitioned the Department to be included.

It was moved and seconded that we adopt the original scheme outlined in the posters and press, with the alteration of boundary as proposed, this was followed an amendment. That we disestablish the proposed district, which was carried.

This means that the proposed Hospital District which included Cereal and Chinook have been defeated and will be abandoned for a time at least.

Drought Resistance

Despite the favourable moisture conditions prevailing in the Prairie Provinces during the last year, we must not forget that drought is still the greatest hazard in the production of crops and livestock.

There is no evidence that the amount or seasonal distribution of rainfall can be influenced by man, but some successes have been made by enthusiastic irrigationists. Therefore, all we can do is to make better use of the rainfall we get. Broadly speaking, this is done in three ways.

The first involves water-saving devices, such as dams and dugouts for farmstead water supplies and even for small-scale irrigation. The second involves tillage practices which prevent or reduce runoff and which control weeds.

The third method is concerned with the use of drought-resistant varieties or crops. A drought-resistant crop is one which makes efficient use of a limited supply of moisture. For example, crested wheat grass is drought-resistant, timothy is not. Similar, though smaller differences may be observed between different varieties of wheat. On the open plains, where moisture is more limited, some varieties yield more than others, but these differences are less pronounced than that between crested wheat grass and timothy. Writers and speakers who offer hope that the drought problem will be solved by resistant varieties as was the rust problem are mere prophets. Our wheat breeders will make progress, but it will be slow and gradual. Don't look for a "Russian Thistle" wheat variety.

Kiks the Kangaroos Cartoons

Tuesday, July 11th, 8:30

"I guess it's up to me!"

Now that I can go I'm not going to stick around and let the other fellows do it.

Bill and Jack went over last week, and Fred's been over there a year. Now it's my chance.

It's going to take months of training before I can get fighting-fit, so I'd better get moving today.

Yes sir! I'm going now, to tell Dad and Mom that I'm on my way to sign up.
